

I am writing to express my concern over the possibility that an LPFM broadcaster may replace the programming currently offered by K-LOVE (in my area, 94.3 FM). K-LOVE has provided consistent, positive radio programming which has included not only the entertainment of the music format but also messages of encouragement from reknown speakers. When nearly every other radio station in this area finds it easier to entertain adult audiences with sexual inuendos and outright sex-talk, I can find it safe to have this station on anytime, anywhere and with any audience.

Although it is mainly a Christian-based format, I have friends of many other faiths (including Jewish and Muslim) that have listened and enjoyed the music of this station. Since there is no other format in this area quite like K-LOVE, I know that the Chicagoland area would be impacted negatively by the absence of this radio station (WMBI is a varied format which does not always play music and WZFS is definitely geared more for a younger audience with more dance-formatted type music). K-LOVE provides the consistent message of hope that this area is looking for and I would strongly urge that the LPFM station do not expand into this market or effect the broadcasting of this station. Thank you.
